

LIVER 360

From biology to technology, from training to outcomes

Novembre 2026, Peschiera del Garda

Orario: 9-17

Ogni seduta avrà un radiologo – oncologo – chirurgo senior – chirurgo young per la simulazione del MDT

Lecture: Train Them Like You'll Be Their Patient - Building the Next Liver Surgeon (Benedetto Ielpo – Barcellona)

SESSION 1: HCC in the immunotherapy era: redefining resectability

- Beyond classification – the concept of hierarchy
- “New-adjuvant” therapy in borderline - advanced HCC: the role of immunotherapy
- Redo approaches in recurrent HCC
- MDT pathways: standardizing decisions without standardizing patients (Alessandra Auriemma)
- The hot seat: HCC Tumor Board (2 scenarios)

SESSION 2: Cholangiocarcinoma: when biology beats anatomy (and when it doesn't)

- R0 in Perihilar Cholangiocarcinoma: Plan or Hope?
- Robotic resection in PHCC: Safer Precision or Expensive Risk?
- Biology driven decisions in ICC
- The hot seat: ICC/PHCC Tumor Board (2 scenarios)

SESSION 3: combined strategies in CRLM - major hepatectomy is over?

- Turning Holes into Hope: The Gruyère Approach to CRLM
- Cut, Burn, Cure: Hybrid Strategies for CRLM
- CRLM Debulking: Palliation, Bridge, or Wrong Indication?
- Who Leads the Dance? Colorectal vs Liver surgeon in synchronous CRLM
- The hot seat: CRLM tumor board (2 scenarios)

SESSION 4: Tools or Toys? Technology with measurable impact in liver surgery

- AI decision support: risk models e imaging-based prediction
- Histotripsy: Breaking Tumors, Not Livers (Dr Teik Choon See – Cambridge)
- Robotic Liver Transplant: Where the Evidence Meets the Learning Curve (Prof. Stefano Di Sandro)
- From Guess to Guidance: Real-Time Liver Mapping in the OR
