

**Sabato 3 ottobre 2026**

Sala Conferenze Ordine dei Medici Chirurghi e degli Odontoiatri della Provincia di Viterbo

***Moderna odontoiatria estetica: Injection technique vs Faccette***

**7 crediti ECM**

*Dott. Daniele GENSINI - Roberto TURRINI*

**PROGRAMMA**

Evoluzione dell'odontoiatria estetica: dall'approccio protesico tradizionale alla filosofia minimamente invasiva.

Analisi estetica del sorriso: parametri estetici, proporzioni dentali, fotografia e pianificazione del caso.

Diagnosi e selezione del paziente: indicazioni, controindicazioni e definizione degli obiettivi terapeutici.

L'Injection technique: principi biologici, razionale clinico, materiali e workflow digitale e analogico.

Le faccette estetiche: tipologie, materiali (ceramica e composito), preparazione dentale e protocolli adesivi.

Confronto clinico: Injection Technique vs Faccette, invasività, estetica, longevità, costi, tempi operativi e possibilità di riparazione.

La scelta del trattamento: algoritmi decisionali basati su evidenze scientifiche e aspettative del paziente.

Presentazione di casi clinici: discussione di casi semplici e complessi con analisi critica delle diverse opzioni terapeutiche.

Complicanze e mantenimento: errori più comuni, follow-up, manutenzione e gestione dei restauri nel tempo.

Tavola rotonda e discussione finale: domande, confronto tra i partecipanti e definizione di protocolli clinici applicabili nella pratica quotidiana.

**ORARIO**

08.30 – 09.00 *Segreteria*

09.00 - 11.00 *Lavori*

11.00 - 11.15 *Coffee break*

11.15 - 13.30 *Lavori*

13.30 – 14.15 *Light lunch*

14.15 - 16.30 *Lavori*

16.30 – 17.00 *Conclusioni e verifica apprendimento*

**OBIETTIVI CORSO**

L'odontoiatria estetica moderna offre approcci sempre più conservativi e personalizzati per il miglioramento del sorriso. Tra le principali opzioni terapeutiche si distinguono le tecniche di injection molding (restauri diretti in composito mediante mascherine in silicone) e le faccette indirette in ceramica o composito. L'injection molding rappresenta una soluzione minimamente invasiva, conveniente perché alla portata di tutti, ideale per correggere difetti di forma, usura e piccoli disallineamenti, preservando al massimo la struttura dentale. Le faccette, invece,
